The Western Federal Lands Highway Division of the Federal Highway Administration, in providing services to the Denali Commission, invites you to a public meeting regarding the Kwethluk Roads Repair and Extension project.

We are in the process of completing environmental compliance activities and developing plans for the design and construction of improvements to Jay Hammond Way, one of the main streets in Kwethluk. We are also investigating the extension of the road to a proposed new barge landing on the Kuskoquak Slough.

Project Purpose is to:

- Reconstruct the roads to improve drainage, road structure and stability
- Place surfacing to reduce dust
- Reduce the need for maintenance and provide a road that is sustainable for the community
- Consider providing access that will allow materials to be transported from the proposed barge landing to town.

Why should you attend this meeting?

The meeting will provide information on the project and solicit public comments for consideration during the design phase.

Staff from the project will be available to discuss, answer questions and take your comments.
